Office of Renewable Energy Siting  
Albany, New York

[General@ORES.ny.gov](mailto:General@ORES.ny.gov)

Be known that,

Pursuant to resolution # 22 of the Town of Glen  
Town Board's position on the proposed application of  
ConnectGen Montgomery County LLC

The potential application of ConnectGen, LLC plans to  
apply to ORES to install Solar Photovoltaic Modules  
with a proposed Nameplate capacity of 100 MW to be  
located solely in the Town of Glen, Montgomery  
County, NY. New York Independent System Operator  
(NYISO) Interconnection Queue (Q#1231) currently  
lacks a NYS PSC Article 10/ORES case number.

"ConnectGen expects to install up to 100 Megawatts of  
Solar energy in the projected area." The Town is not  
aware of the meets and bounds of this proposal as it  
lacks description. The project has submitted an  
interconnection request (Q1231). This project will  
seek state siting permit under section 94-c through  
ORES.

The Town of Glen through the Town Board hereby seeks intervention to insure this second proposed project by ConnectGen, described herewith, located in the Town of Glen to be fully vetted and reviewed solely under the application process as a new application. The Town Board of the Town of Glen fully recognizes intent and objects to ConnectGen leveraging any engagement and feedback of previous public meetings and Environmental Impacts of any other application by ConnectGen in the Town of Glen. To refer to Mill Point 2 as an expansion of a previous application of Mill Point 1 (Q1031) is a gross overreach lacking the mandated substantial review required through the compliance siting process you are required to provide.

In fact, Mill Point 2 is not an expansion of any previous application. As stated, this application will require separate interconnections(Q#1231) approval for adequate availability to the grid, additional Environmental Impacts, Public Health, Safety, and Design of solar energy projects in the Town of Glen. The Town would fully expect required community meetings, municipal engagement and transparency in the application certification process with the full understanding of the area being discussed in the proposal. This evolving process throughout all phases of the section 94-c review process (pre-application phase, application phase, hearing and decision phase, and post-certification phase) must not be minimized at the expense of the Town or convenience of the applicant.

## Resolution 22

Sponsored by: Councilmember Crewell

Seconded by: Councilmember Whiteman

Whereas: The Town of Glen is in possession of Attachment B Public Release of Bid Facility Information containing Mill Point Solar 2 by proposer ConnectGen, Montgomery County, LLC

Whereas: this proposal solely lies within The Town of Glen, Montgomery County, NY. with a Nameplate Capacity of 100 MW bearing the NYISO Interconnection Queue Number Q#1231.

And Whereas: The Proposer has previously submitted documentation of intent proposing the development and construction of a 250 MW Solar generation facility to be constructed solely in The Town of Glen, Montgomery County, NY.

And Whereas: The Town of Glen has attached hereto a memorandum outlining these two proposals to be separate and apart individual proposals with separate Nameplates.

Now therefore be it Resolved: The Town of Glen Town Board hereby requests each submitted proposal to be reviewed and considered as single applications having due process of the 94-c application procedures and complete review of including, yet not limited to, public informational meetings, cumulative environmental impacts, public health, safety and design of Solar Energy projects.

Roll Call:	<u>Councilmember Kelly</u>	Aye X	Nay
	<u>Councilmember Crewell</u>	Aye X	Nay
	<u>Councilmember Farina</u>	Aye X	Nay
	<u>Councilmember Whiteman</u>	Aye X	Nay
	<u>Supervisor Reilly</u>	Aye X	Nay

Roxanne Douglas  
Town Clerk Town of Glen
