

Mill Point Solar I

Montgomery County, New York

NOTICE OF MAJOR AMENDMENT TO APPLICATION

ConnectGen Montgomery County LLC (ConnectGen) is proposing to construct the Mill Point Solar I Project (Project), a proposed 250 megawatt (MW) solar powered major electric generating facility proposed to be located in the Town of Glen, Montgomery County, New York. Pursuant to 16 NYCRR Part 1100 Section 1100-1.6 this notice announces that on or around August 2, 2024, ConnectGen will file a Major Amendment with the Office of Renewable Energy Siting and Electric Transmission (ORES).

On February 12, 2024, ConnectGen submitted an Application to ORES under former N.Y. Executive Law 94-c (currently Public Service Law Article VIII). On June 26, 2024, ConnectGen submitted a Request for Permission to Submit an Amendment to the Application. On July 11, 2024, ORES granted ConnectGen's request to submit an amendment and proceed with the amendment as a Major Amendment. The Amendment includes additional land for photovoltaic (PV) array on parcel ID 67.-1-13.2. The initial Application already sited panels on a portion of parcel ID 67.-1-13.2. (see Figure below). The Amendment does not add any new or additional tax parcels to the Project. In addition to the inclusion of panels, two inverter locations will shift to support the new array (but no inverters will be added) and a new access road will run along the northwestern portion of the parcel boundary. The addition of this new access road will now allow ConnectGen to completely avoid State Wetland W-KCF-13 and reduce the overall Project impacts to State wetland features.

All updated application materials remain subject to the ORES review and subsequent determination of completeness in compliance with Public Service Law Article VIII and 16 NYCRR part 1100. ConnectGen is proposing to file a Supplement and Amended Application on or before August 2, 2024 addressing this

Major Amendment, including revisions to various Exhibits of the Permit Application, along with additional information proposed by the Applicant to address the Office's Notice of Incomplete Application dated April 12, 2024.

Further details regarding the Project and updates on the Amendment will be provided on <https://www.millpointsolari.com/>. To get in touch with a member of the Project team, contact us at:
